EDUCATION

Georgia Institute of Technology

B.S. Computer Science (Concentration in HCI, Minor in Marketing)

May 2027

Atlanta, GA

- **Major GPA:** 3.88 / 4.0

SKILLS & TOOLS

Tools: Cursor, Replit, Figma, Framer, Adobe Creative Suite, Blender, Claude Code, Claude Design

UX & Design: AI-aided rapid prototyping, POC-first product exploration, Real-time 3D for web, 0→1 proofs-of-concept

Programming: Java, Python, HTML/CSS, JavaScript, Three.js, C

RELEVANT EXPERIENCE

Product Manager

Aug 2026 – Present

Bits of Good

Atlanta, GA

- **Own product strategy** for **ABLE Alliance × Georgia Tech Paratransit's end-to-end digital ride platform**, translating the needs of students with disabilities and PTS operations into product requirements while **leading 4 designers and 6 developers**, replacing a rigid Excel/email scheduling system and **serving 50-100 riders annually**.
- Driving development of **recurring ride scheduling, cancellations and edits, ride lifecycle tracking, student-driver chat, notifications, and mobile workflows** to create a flexible end-to-end paratransit experience; authored the multi-phase product roadmap and feature specification.
- **Redesigning a process** that requires riders to lock schedules 5 days in advance and request changes 2–3 days ahead, **enabling self-service ride requests, modifications, recurring rides, driver communication, and real-time ride status**; preparing a pilot with **6 drivers/vehicles, 4 PTS staff, and 4–6 students**.

Product Management Intern

Jun 2026 - Aug 2026

ID.me

Mountain View, CA

- **Led 0→1 development** of ID.me **Call Center Authentication**, owning discovery, competitive research, requirements, UX, prototyping, and implementation to replace legacy knowledge-based auth (KBA) for clients such as the **IRS, VA, SSA, and state governments**, spanning **millions of users** and **tens of millions of annual calls**.
- **Reduced caller authentication** from up to **7 minutes to <90 seconds** in a working proof of technology; analyzed client Snowflake data, shadowed ID.me helpdesk calls, and interviewed 5 GTM experts to identify fraud, agent handle time, and authentication friction as core opportunities and **scope a focused V1**.
- Prototyped **8 authentication scenarios** and produced a multi-phase PRD, then built the real V1 in **Ruby on Rails with Claude Code**, integrating ID.me wallet authentication with ID.me endpoints and IVR and CRM workflows and authoring the project's first commit; **presented to CEO, CFO, Chief Design Officer, and CISO** and passed the project to engineering for slated product launch.

Product Management Intern (Full-Time) / (Part-Time) ↗

May 2025 – Aug 2025 / Dec 2025 – May 2026

Articul8 AI

Dublin, CA

- **Shipped a new product intake flow** that cut idea-to-implementation time from **6 weeks to 1 week**, rapidly prototyping AI-aided proofs-of-concept to synchronize engineering, product, and leadership UX improvements.
- **Delivered a revamped citation experience** for Articul8's **Generative AI platform**, developing intuitive previews and embedded popups that significantly improved citation UI's transparency and **strengthened client trust**.
- **Contributed directly to Aether's semiconductor-model workflows** by partnering with **Intel NEX** and domain SMEs to research, design, and ship improvements that made the model easier to use.
- **Company-wide engagement initiatives**, engaging **60+ employees** and improving cross-team connection.

PROJECTS

Interactive 3D iPod with Live User Music Data ↗ | *Spline 3D, Node.js, JavaScript, REST APIs, HTML/CSS*

- Produced an **interactive 3D iPod experience** that visualizes my real-time listening data, reducing user bounce rate on my website by **15%** by blending nostalgia-driven design and modern APIs. Organically adopted by **40+ users online**.
- Built a Node.js backend to handle API logic and calls, text truncation, and transliteration to display music metadata on the web. Optimized 3D assets for web display, minimizing load times by 55% (2.6s → 1.7s).
